

## Energy Efficient Lighting

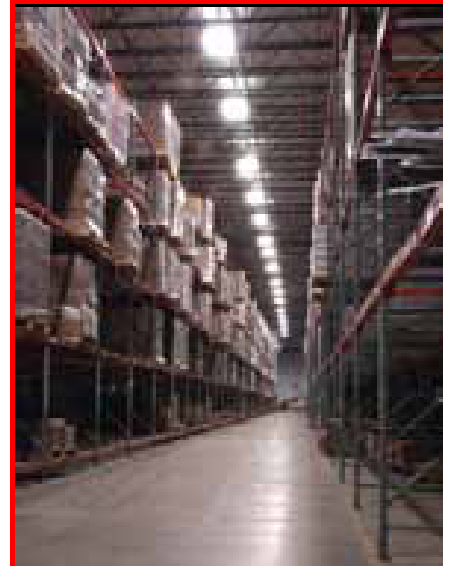

### The Fluorescent Advantage

The most popular and productive lighting upgrades today involve replacing outdated fluorescent or HID (High Intensity Discharge) lighting systems. High Performance fluorescent lighting systems utilize the latest technologies and design platforms to provide dramatic energy savings and superior performance. Let PeakLogix help you determine the best solution for your lighting needs with an on-site light survey.

- **Energy savings**—30 to 50% energy reduction for comparable light levels.
- **Superior Lumen Maintenance**—Maintain 90 to 95% of initial light output and extended life. Last 25,000 hours based on 10 hour starts.
- **Instant On/Off**—In the event of power interruption, fluorescent lamps are back on instantly. Integral stand-by emergency battery packs are available.
- **Improved Lighting Uniformity** .
- **Environmentally friendly.**

**Energy Savings**  
Fluorescent high bays offer dramatic energy savings opportunities.

**IDEAL SOLUTION FOR:**

Retail

Warehouses

Manufacturing Facilities

Gymnasiums

Cafeterias

Auditoriums
