

GRAVITY CONVEYORS

Provide an economical means of transporting product where the conveyor does not need to be powered. Gravity conveyor is used in picking or assembly operations where the product or tote is pushed to the next location as required.

Gravity Roller Conveyor

- ◆ Can carry heavier items than skatewheel conveyor.
- ◆ Useful in setting up permanent or temporary conveyor lines in warehousing activities, shipping departments, assembly areas, etc.
- ◆ Most products will convey with a minimum amount of pitch.

Gravity Skatewheel Conveyor

- ◆ Ideally used to convey lightweight packages or when operation requires lightweight sections.
- ◆ Skatewheel is useful in setting up temporary conveyor lines in warehousing activities, shipping departments, assembly areas, etc.
